According to Dr. Gardiner, Key West

has for years enjoyed immunity from ma-

larial fevers of all kinds, and it is now recalled that systematic searches of the is-land have heretofore failed to demonstrate

an unsual and malignant form of malaria.

Dr. Gardiner recommends that measures

be taken to stamp out the anopheles in Key West, and the citizens would be glad to

know what to do.
Dr. Gardiner says the first of the insects

discovered was July 29, and since that time thirty-six have been captured, only two

being males. The two males were found in

a stable in Key West. They seem to have

been working on the horses of the town, and were considerate enough to give the

more tender humanity to the females. How much longer this division will keep up among the genders of the anopheles Dr. Gardiner does not undertake to report.

### NO CHANGE IN POLICY.

#### Seabord Officials Express Opinion on Sale of That Road.

PORTSMOUTH, Va., August 21, 1904. Officials of the Seaboard Air Line railway in this city state that the sale of the entire control of the road to the Blair-Ryan syndicate does not by any means indicate that there will be any change in the policy of the system. The only matter that excites surprise is the failure of the Baltimore syndidate, directed by Mr. Gustavus Ober, capitalist and relative of John Skelton Williams, to complete the pool whereby it was designed to retain in the hands of the original promoters of the greater Seaboard system the control of the line.

The actual sale to Mr. Ryan and his associates of the entire control of the Seaboard Air Line properties means simply confirmation of a tentative arrangement entered into last year at the time the system was hard up and borrowed from the Blair-Cooledge banking house of New York and from Mr. Ryan jointly the sum of \$5,000,000

been endeavoring to secure the controlling interest in the Seaboard system. He first went after the Seaboard and Roanoke railin 1894. When Mr. John Skelton Williams came in and by the transfer of his Georgia and Alabama and the purchase of the Florida Central and Peninsula railways and proposed to consolidate all of them Mr. Ryan strenuously objected. He entered over a hundred law suits to stop the consolidation, but was outwitted by Mr. Williams' transfer of the treasury holdings of the stituent properties from the Seaboard and Roanoke to the Raleigh and Gaston, leaving Mr. Ryan the majority stockholder dominating the system.

### INVESTIGATION OF THE TICK. Dr. Stiles Denies That It Communi-

cates Spotted Fever.

The tick does not communicate the much dreaded spotted fever of the Rocky mountains, according to a preliminary report the presence of any of the genus anopheles. Dr. Gardiner believes that the new mosquito was introduced into Key West by fruit-carrying vessels from Vera Cruz, New Mexico, where they are plentiful, and where they are supposed to have caused an unsual and malignment form of malaria. just made to the marine hospital service by C. W. Stiles, chief of the division of zoology, who has returned from the Bitter Root valley of Montana, where the rav ages of the disease this summer have created terror. After the discovery that mosquitoes transmit yellow fever and probably malaria the idea was suggested that the western tick was the medium of conveying spotted fever.

Dr. Stiles says the tick theory has caused serious financial loss to the Bitter Root valley and elsewhere, and has produced effects which have bordered on hysteria. In closing his report Dr. Stiles says: In justice to the property interests of th

valley and the peace of mind of the in-habitants, I think no time should be lost in publishing the statement that the re-sults of study this year have absolutely and totally failed to confirm the hypothesis that the tick is at the bottom of the dis-

Dr. Stiles also worked on the theory that the disease originates from a pyroplasma in the dirty little gophers of the western plains. He doubts if such a parasite in rodents would develop in man. He likewise finds arguments of a zoogeographic nature against assuming that spotted fever originates in gophers. He says that the little spermophiles of the Bitter Root valley are frequently invested with fleas and lice, and less frequently with ticks. The tick that is common in the valley is found on horses, cattle and dogs, and often on man, but there is nothing, he says, to indicate that a hibernating animal is neces sary for their development.

Dr. Stiles was unable to confirm any por

tion of the theory that all cases of spotted fever are preceded by tick bites. He ex-amined ten cases, and in five cases he was unable to establish that ticks had bitten

### In Memoriam.

GHEEN. In loving remembrance of our dear MABEL GHEEN, who died five years ago to-We shall know her by the love-light that still lingers in her eyes. Though her face bright with heaven's glory She who vanished from earth's portals and was lost a little while. In the summer land of paradise divine.

JONES. In loving remembrance of LAURA RICH, ARDS JONES. In a far-off, distant graveyard,
Where the trees their branches wave,
Lies my beloved daughter,
In her cold and silent grave.
But God is mighty; He knows best;
He has taken her home to rest. Five years ago today

BY MOTHER AND SISTER.

LACEY. In loving remembrance of my devoted husband and a loving father, JOHN F. LACEY, who died three years ago today, August 22, A precious one from us has gone, A voice we loved is stilled; A place is vacant in our home Which never can be filled.

BY HIS WIFE AND CHILDREN SULLIVAN. In sad but loving remembrance of my dear husband, JOHN SULLIVAN, who died

He shall sleep, but not forever; There shall be a glorious dawn; We shall meet to part, no, never, On the resurrection morn BY HIS DEVOTED WIFE.
